

Horizon Bottle 150ml

The Horizon Bottles are a range of thin-walled PET bottles with two options of screen-threaded PP caps, the Horizon Cap and the Lotus Cap in a standard GCM1 24/410 neck size. HCP can decorate this pack by printing, foiling or applying a label. The bottle can be colour-matched and moulded in either opaque or semi-transparent options to show the product fill level. The LDPE reducer in the bottle neck allows for controlled dispensing of product - ideal for lotion or make-up removers. This item is available in 150ml, 120ml and 100ml sizes.

HCP Ref:

With Horizon Cap: 74M / With Lotus Cap: 79R+702
