

Ø35mm Cylindrical Airless Tube Shoulder Pump

Airless Tubes are ideal containers for lotions, serums and creams with a pump providing a precise dosage. Portable and user friendly these tubes can be used in any angle. The Airless Tubes are available in cylindrical or oval shapes offering a range of capacities from 10 to 70ml and the tubes are made in 5 layer co-ex or ABL (Aluminium Barrier Laminate). Extensive decoration options include vivid full colour printing, special foils and eye-catching metallic finishes.
