

## Mouse Pouch 35ml (curved base)

The 'Mouse Series' offers versatility for profile customisation of both the inner pouch and external bottle, with boundless decoration possibilities to suit all brand identities. Offering a unique and convenient 360° application to effectively dispense product from any angle. Available as either single or double-wall construction, the chic elliptical shape is ergonomic to handle with excellent portability and leak prevention due to the innovative pump-locking system. The multi-layer aluminium inner pouch optimises product barrier protection and chemical resistance while achieving a stunning, contemporary appearance. By eliminating contact with the air, the superior formula preservation provided by the airless system makes this pack suitable for oxygen-sensitive formulations including suncare, foundation and skincare creams such as retinol or serums.
