

Portable Airless Compact/Jar – 30g

For easy 'on-the-go' application, this highly portable airless compact-style jar has a full-size mirror in the cover and a low ergonomic profile (ø75 x 29.8mm) despite its generous 30g capacity. Suitable for liquid foundation or hybrid skincare/cosmetic products such as tone-up cream. To reduce packaging waste, this item is available with a snap-on refillable unit for sustainable credentials. The airless dispensing system has a self-sealing orifice to minimise air contact for effective product preservation, preventing liquid formula from drying out. As with all Airless Compacts, this item offers excellent hygiene due to reduced risk of contamination. A precise dosage control of 0.2cc is achieved via a wide palette press with great product evacuation to limit waste.
