

Affinity Atmospheric Pump – Slanted Actuator + Flared Collar (GCMI 20/410)

HCP's 'Affinity Atmospheric Pump' is a high-performance dip-tube design that can be paired with either stock or custom bottles. For a fast-to-market solution for skincare or complexion products, the pump can be offered with HCP's cylindrical, thick-walled stock bottles in 30ml or 50ml capacities; premium designs that are suitable for facial serum, lotion and also liquid complexion make-up. HCP's patented engine technology improves dispensing and products consistent engine performance. The soft and smooth actuation ensures a superior consumer experience. The pump is constructed so that no formula is in contact with the metal spring, for excellent compatibility. Available in standard GCMI 18/400 and GCMI 20/410 collar neck sizes, the 'Affinity Atmospheric Pump' is offered with a variety of actuator and collar styles. Dosage options include: 0.12cc, 0.20cc, 0.25cc and 0.30cc. This item has high-cavity tooling with automated assembly, for greater speed to market.
