

Affinity Airless Tube Ø35mm – Slanted Actuator + Flared Collar

Offered by HCP as full-pack solution, the Affinity Airless Pump system enables highly-practical 360 degree application, fast priming and controlled dispensing for an enhanced user-experience. The patented disc-valve engine greatly enhances the dispensing performance with highly viscous formulas. Available in 25mm, 30mm & 35mm diameters, the Affinity Airless Tubes are lightweight, easily portable and perfect for use on-the-go. By limiting air exposure, the Airless technology maintains formula integrity and efficacy by providing effective product preservation and eliminating contamination. Suitable for low to high viscosity skincare and colour cosmetics formulas such as moisturiser, serum, cream, sunscreen, foundation, primer and other complexion products. Select from a wide portfolio of collar and actuator styles to bring the packaging inline with any brand aesthetic. For a premium appearance, customise with HCP's extensive decoration options including vivid full colour printing, special foils, tactile sprays and eye-catching metallic finishes.

HCP Ref:
