

Dial Refill Compact

A patented design that meets as many sustainability challenges as possible, the ‘Dial Pressed Powder Compact' offers a planet-friendly solution without compromise for consumers who expect high-quality aesthetics and functionality but with a reduced environmental impact. With the two-piece cover option, the mirror is removable and retainable; integrated within the cover to reduce materials to a minimum whilst giving the mirror a ‘second life’ and continued brand presence. The one-piece clear cover option offers effective shade-ID. The ‘Dial Compact’ has a mono-material PET construction: for sustainability and durability whilst providing a high-shine finish. Once the mirror is removed, the remaining parts can be placed in the domestic recycling stream. Additionally, the PET PCR supply chain is well-established and validated at HCP.

HCP Ref:
1PC Cover: 104-Q-1 (pilot tool - samples ready for testing)
2PC Cover : 104Q (pilot tool - samples ready for testing)
