

Color Capsule 15ml

The ‘Color Capsule’ is an innovative new pack design from HCP’s Design Futures team that embodies contemporary sensibilities with its elongated, domed profile. Designed to enhance the appeal of skincare and complexion products, this portable packaging exemplifies beauty and desirability. The lightweight and flexible tottle, in contrast to the cool touch of the aluminium cap, creates a visually striking and tactile combination. This sleek design not only elevates the product’s aesthetic but ensures convenient, on-the-go use. The squeezable 15ml tottle and slender nozzle enable controlled and targeted application, while its compact format makes it ideal for travel; portable and pocket-sized.
