Orient Pot

The Orient Pot has a distinctive aesthetic with a unique cap design; whether for promotional activity, line extensions or regular product applications, the Orient Pot offers customers an interesting and unique primary packaging style. The base is suitable for moulding in transparent or opaque PMMA material, while the cap can be moulded in transparent SAN or opaque ABS materials. The Orient cap can be metallised or spray finished to provide a superior and premium appearance and charms, tassels and ribbons can be attached to add extra appeal. The base component can be hotfoil stamped or screen printed to add branding or artwork. The Orient Pot has a wide neck opening, making them ideal for lip gloss and loose powder product applications. The pot has a brimful capacity of 11.8ml and a recommended ‘declared fill’ of 8ml.
